Till Death Do Us Part?

The marriages today are much different than our great grandmother's, in that most do not endure to the end! Why do the modern wives and husbands run for the divorce court at the slightest provocation?

There are many answers to this blotch on our society. A few websites are matching couples of like interests and personalities. That is a start. Many couples are attracted physically and plunge in where angels fear to tread. They wake up in a marriage where they share no common interests, have differing ideologies, and are separated by religion and politics.

Some couples make compromises and allow each other to be themselves, but they are among the minority. Arguments become fast and furious, children are brought on the scene and then the parents many times have differing views on how to rear their children.

Did any one consider their Creator, and consult him on the decision on whom to marry? Most rush headlong into marriage or simply living together.

It has been said, "Marry in haste and repent at leisure." Impatience is a big culprit. "Look before you leap" is certainly true in one of the biggest decisions, next to accepting Christ as personal Savior. If you are contemplating marriage look at the whole picture and take your time. Counsel with your Lord and then follow through on his advice!
