Health Reform

There are many advocates for health reform in America today. Many do not know the best approach to resolve this dilemma and are fighting among themselves.

However the greatest health package for America and all nations on the face of the earth is coming. It will not come through the FDA, Doctors, hospitals, or medical science. The one world government that is so talked about is not the aligning of man's efforts, but of the Kingdom of God!

The Messiah for all mankind will rule justly, and with mercy. He will align the nations with equity for all, and not just a select few. His laws will be given for the benefit of the people over whom he will reign.

Sickness will be abolished and food will be healthful, and not full of preservatives and fillers. Organic farming will be universal! Mankind will be back to the basics and the whole world will look like the original Garden of Eden. Adam and Eve did not need a doctor or lawyer as long as they didn't sin. But when Eve fell for the gigantic lie of Satan, sickness and all evil entered the world. Dis-Ease entered and man has been plagued with sickness and unwholesomeness until this very day.

The King of Kings and the Lord of Lords will have the greatest health package the world has ever known! This is a preview of coming attractions!

Amen and amen
